**Delta specializes in water-based paints, and water-borne coatings for the transportation industries.** Delta supplies the truck, trailer, truck recon, and truck fleet industries; coatings are also manufactured to meet the specific needs of railroad cars, tank cars, hoppers, gondolas and box cars, and wheel manufacturers. Delta transportation coatings are sold under the Aquatech tradename.

**Aquatech Chassis Black** is a low-VOC, water-based paint for OEM and aftermarket use on trucks, trailers, railroad freight cars and tank cars. It is a direct-to-metal coating that dries quickly to a high-gloss and provides superior long-term durability.

**Aquatech Clear** is a high-gloss, low-VOC engine coating that replaces ordinary engine dressing and gives vehicle engines high sales appeal. Used on steel, plastic and rubber surfaces, including tires, vinyl trim and rubber molding, to provide a dry-to-the-touch, "*showroom shine.*"

**Aquatech White** coating was engineered for wheels: from trucks to railcars, to roller coasters! Sets up without running into the bottom of the wheel hub, and dries quickly. Aquatech White is a top quality protective coating providing superior adhesion, superior chip resistance and long-term durability.
